

Construction design specifications

1. Transmission method				
2. Transmitter	(1) Rated output		(4) Type of radio wave / Frequency range	
	(3) Oscillation			
	(4) Modulation			
	(5) Manufacturer names	Manufacturer	Model name	Serial number
4. Antenna		(1) Model and configuration	(2) Gain	
5. Auxiliary equipment Model and Serial		Protection against interface The radio equipment regulation article 9-4, Item 9 (Automatic Transmission / reception of ID code)		
6. Other Equipment design specifications		It has agreed on the conditions specified to Chapter 3 of Radio Law about design specifications other than items mentioned to the column 1-5.		
7. Attached drawing		<ul style="list-style-type: none"> • Block diagram • Parts layout drawing • External view 		
8. Reference		Antenna impedance : Operating temperature Range : -**°C ~ +**°C Rated supply voltage : *V-1.0, +0.1V (Battery), ** ± 10% (USB) Structure : The RF components including modulation are enclosed with a metal shield by soldering, thus it is not easily opened to prevent illegal modification.		

Note: you can not change the format This document is stipulated in the Radio Law of Japan, please use this form.

Small electricity data communications system application attachment documents (WLAN,BT)

1. Spreading process	DS	FH		Frequency distribution	<u>Uniformly</u>	Not
		DS/FH Mix.		Spreading bandwidth at the time of the FH stop	kHz	Uniformly
OFDM						
2. Normal transmission mode	Continuance	<u>Burst</u>	Of the burst wave pattern Figure of summary 			
3. Forced transmission mode(test mode)	The consecutive transmission		<u>Possibility</u> / impossibility			
	The continuous burst transmission		<u>Possibility</u> / impossibility		Duty cycle	Burst time cycle
	Spreading stop / Unmodulated		<u>Possibility</u> / impossibility			
	Transmission electricity at the time of the Spreading stop () dBm			Continuation	Burst	
4. Forced Receive mode	Consecutive reception modes					Possibility / impossibility
5. Control of the test apparatus	<u>Manual</u> / CPU / Both are possible					
6. Spread code	Code sequence M Gold Other()				Spread bandwidth ()MHz	
	Code length ()bit				Code speed ()kb/s	
7. Coding test signal (data)	External	<u>Internal</u>	Code sequence M Gold Other() Code length ()bit			
8. Connection to telecommunications facilities	No	<u>Yes</u>	Carrier sense function Yes <u>No</u> ()dBm			
			Correlative signal sense function Yes <u>No</u> ()dBm			
9. Other						
10. Reference						

Documents required for certification

Please attach a summary of the design work as a construction design document another Annex, was the following matters:.

1. Overview of the design and development

Please indicate the description of the items below (It may be described in the block diagram.).

- (1) Stabilization of frequency
- (2) Restriction of occupied bandwidth
- (3) Control of the antenna power
- (4) Suppression of spurious radiation
- (5) Suppression of radio waves, etc. emit secondary
- (6) Interference prevention function, etc.
- (7) Prevent illegal modification
- (8) Use form, the environmental conditions

2. Design standard value

For test items of rules on technical standards conformity certification of specified radio equipment, please describe the design standard value for each item.

3. Circuit Description

By radio equipment system diagram, etc., and describe the behavior description of each part.

During the description, please describe the name of the parts used, the type name and part number.

Please indicate processing frequency in the frequency synthesis circuit and filter circuit.

4. Radio equipment block diagram

5. Parts layout diagram

6. Specifications of the antenna

Gain, radiation pattern, external view

7. Data sheet

Data sheet of the major elements shown in radio equipment block diagram

8. Certification label drawings

EX.)

Please describe the material of the label, also the kind of the pressure-sensitive adhesive.

9. External view

Deployment Example

Please fill in the joining position of the name plate (Certificate number) dimensions and six-sided view (front, rear, left and right sides, top and bottom) in.

EX.)
