Applicants for conformity assessment of Specified Electrical Appliances and Materials

Mar. 10th, 2026

Application Methods for Conformity Assessment under the revision of the Description of Electrical Appliances and Materials, Appendix 10 (Radio Noise)

Technical requirements the ministerial ordinance for electrical appliance Appendix 10 (Radio Noise) have been consolidated to the harmonized standards of Appendix 12 (J55014-1(H27), J55032(H29), etc.) in compliance with the international standards.

The grace period is set to Aug. 30th, 2028.

Please find the application methods for conformity assessments at JET as follows:

SUBJECTS:

The applicants who plan to apply for conformity assessment based on Appendix 8

1. Application

(1) Application for Conformity Assessments under the Revised Appendix 10 (J55014-1(H27), J55032(H29), etc.), i.e., (The new description)

In case of an application under the new description, please fulfill '2. Applied Standard for Testing' of 'ANNEX to APPLICATION FORM (Form 4)' as "Appendix 8 and Appendix 10 Jxx(Hxx)" (to 'xx', please enter the standard number and year of Appendix 12 which is applied to the electrical appliance).

(2) Application for Conformity Assessments under the Former Description Appendix 10 (Article 1 - 9), i.e., (The former description)

Applications under the former description will be acceptable by the end of the grace period. In this case, please fulfill '2. Applied Standard for Testing' of 'ANNEX to APPLICATION FORM (Form 4)' as "Appendix 8 and Appendix 10 (Article xx)" (to 'xx', please enter the article number which is applied to the electrical appliance).

NOTE: The application under the former description will be accepted by Feb. 29th, 2028, since the conformity assessments should be completed by the end of the grace period.

Even if the application is accepted before the end of the grace period, reapplication under the new description described above (1) may be required if the conformity test is not expected to be completed by the end of the grace period due to reasons including postponing

of an assessment commencement and/or validation of improvements.

In above case, please note that reassessment of Radio Noise. and/or additional costs may be required.

2. Entry of the Applied Standard for Testing on the Certificate of Conformity

(1) Sample Entry according to The New Description

Applications under the new description require the following entries.

Sample (Magnetic Therapeutic Appliances): Appendix 8 Section 1, Section 2 Chapter 93 and Appendix 10 J55014-1(H27)

(2) Sample Entry according to The Former Description

Applications under the former description require no changes from the former case.

Sample (DC Power Supply Units): Appendix 8 Section 1, Section 2 Chapter 102 and Appendix 10 Chapter 5

3. Supplements

If an applicant holds a validated Certificate of Conformity based on the conformity assessment under the former description, the certificate is effective until the expiry date noted on the certificate. In this case, no further conformity assessments will be necessary throughout its effective period.

Please note that electrical appliances which will be imported after the completion of the grace period will be required to conform to the new description.

JET provides the Radio Noise assessment according to the new description via our assessment services.

Please feel free to contact us if such assessment is necessary.
