

(Form No.10-1/2)

Application for Testing on the change of the Technical Requirements

Date: _____ (month/day/year)
Receipt number: _____

To: JAPAN ELECTRICAL SAFETY & ENVIRONMENT TECHNOLOGY
LABORATORIES

We apply for the testing on the change of the Technical Requirements according to the Rules for Operation of JET certification as follows:

1. Certificate number:

2. Product name:

3. Model of the product:

4. Issuance of the Certificate (Please tick the appropriate box) Please issue No need

5. Person in charge of the application:

Company name:

Postal Address:

Department, Post:

Name:

氏名 :

(Signature or seal)

TEL:

FAX:

E-mail:

6. Issuance of Test Report

Please issue (subject to fees) (Simplified Detailed) (Japanese English)

N. B. If the certificate in English is needed, please let us know the company name, the postal address, etc. in English. Please note that the contents of the certificate may be limited depending on the contents of the application.

No need to issue.

7. The date of issue of the certificate

(If the date within a month from the date of the application is designated, it is subject to fees.)

Please issue on the designated day (the date desired: month/day/year)

No need to designate.

8. Information on the test samples

N. B. ~~Please note that the necessary quantity of the test samples will be informed after JET checks the submitted application documents.~~

If the samples are big, please consult in advance with the laboratory which is to receive them.

The samples will be sent to JET (on month/day/year)
(the number of packages:)

We will bring the samples to JET (on month/day/year)

Otherwise ()

9. Other information

1) For inquiries, JET is to contact:

Person in charge of the application the following contact 1 the following contact 2

2) Please send the certificate / the test report to:

Person in charge of the application the following contact 1 the following contact 2

3) Please send the invoice, bill for the testing, etc. to:

Person in charge of the application the following contact 1 the following contact 2

(If the invoice, bill is to be addressed to the person other than the applicant, please write to that effect.)

4) Return of the samples, etc. after testing

Please send the samples, with payment on delivery, to:

Person in charge of the application the following contact 1 the following contact 2

We will go to JET and collect the samples.

Please discard the samples at JET. (Small-sized samples only. The applicant bears the expenses of discarding.)

(Table 2)

Attachment
to the application for S-JET certification
on the change of the Technical Requirements

(Please check the following Tables, write the number relevant to your Conditions on the following space, and submit this paper when you make the application.)

Table 2 What is to be done on the change of the Technical Requirements

Conditions	What is to be done on the change of the Technical Requirements
For all cases (attachment plugs, residual current operated circuit breakers with plug pins, direct plug-in equipment)	
(1) No technical information related to the revised requirements is available at all.	JET is to carry out the testing. If the same material is used for more than one model of plugs, and application for testing of these plugs is made together, the test data of the material can be used in common. (Fee: JPY29,000)
(2) The product is CMJ registered.	JET is to make use of the CMJ registration data.
(3) The product is UL listed.	If the applied requirements meet the relevant JIS, JET is to check the UL listing document, etc. and make use of it appropriately. (Fee: JPY6,000) If the JIS is not met, JET is to carry out the testing.

- If JET is to carry out the testing, please submit 2 pieces of test samples. Material plates before molding are desirable as test samples, but we are also ready to accept molded ones as long as the testing is possible with them.
- In addition to the fees stated in the above Table, the basic fee for application on the change JPY10,000 is charged.

< Please write your information on the following spaces.>

Your “conditions”: (Please write the number <1, 2, 3, 4 or 5> relevant to your conditions from the above Table 2. If the product is registered, please state the registration information.>

The relevant model number: (If many models are registered, they can be stated on the separate sheet(s).)
