

試験品の構造、材質及び性能の概要

The Outline of Products for testing : Structure, Material and Performance

1 . 構造の概要

(製品モデル名、並びに当該製品の機能、構造、動作原理などの概要を記載して下さい。)

1. The Outline of Structure

(Please state the model name of the product as well as the outline of its function, structure and operating principles and so on.)

2 . 材質

(外郭及び主要部品の材料(変圧器、電動機などは「巻線の絶縁の種類」の根拠となる絶縁物名)を記載して下さい。)

2. Material

(Please state the material of the outer case and main components (as for transformers, motors and so on, the name of the insulator by which “winding insulation class” is to be judged).)

3 . 性能又は定格

(性能、電圧・消費電力などの電気定格等、「型式の区分」が判断できる内容を記載して下さい。)

3. Performance (Ratings)

(Please state the factors by which “Type Classification” can be judged, such as performance, the ratings for voltage, power consumption and so on.)

4 . 技術的情報

(製品の写真・図面、構成部品一覧表、回路図、取扱説明書など必要な情報を添付)

4. Technical information

(Please provide photos, drawings, a list of components, circuit diagrams, an instruction manual and other necessary information.)
